-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 September 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-30 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Art Unit: 1615

DETAILED ACTION

Receipt of Papers

Receipt is acknowledged of the Extension of Time, the Request for an RCE, and the Preliminary Amendment D, all received by the Office on September 26, 2002.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7-19, 21, 22, 24, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,523,091 to Pastour *et al.* (hereinafter Pastour). Pastour discloses a cosmetic emulsion composition which comprises a silicone, a gelling agent, and an emulsifying agent (abstract). Pastour teaches that the emulsifying agent can be dimethicone and mixtures thereof (c 1, l 45). Pastour further teaches that the silicone can be a cyclomethicone (c 3, l 18). Pastour also allows for additives such as vegetable oils such as jojoba oil, apricot oil, grape seed oil, and others (c 5, l 1-13), and he also includes surfactants (c 5, l 20), and pigments (c 5, l 44). Pastour also teaches that the composition can comprise active ingredients such as plant extracts, and these can be present from between 1 and 15%. Further, the cosmetic can contain fillers of plants, either inorganic or synthetic, such as starch or nylon (c 6, l 3-11). Lastly, Pastour teaches that his composition can be in the form of a mascara.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,523,091 to Pastour *et al.*. Pastour is discussed above as disclosing a cosmetic composition, which can be a mascara, and which can contain actives such as plant extracts. Pastour does not teach the specific percent of extract as claimed in claim 3. However, he does teach a very small and similar amount of extract. Further, Pastour does not teach the specific natural non-plant fiber as claimed by applicant. However, he does teach the inclusion of inorganic and synthetic fillers in general. Pastour does not teach the specific surfactant as claimed by applicant. It is the position of the examiner that the exact percent of the extract, the specific inorganic additives, and the specific surfactant are all limitations which would be routinely determined by one of ordinary skill in the art, as being suitable, based on the generic teachings in Pastour. Furthermore, the examiner reads the teaching of plant extract to include any and all plants, as Pastour does not differentiate. Therefore, this teaching includes both vegetables and fruits. One of ordinary skill in the art would have been motivated to make a mascara composition based on Pastour's teachings, which comprises any plant extract, and also contains inorganic or synthetic fillers and surfactants. The expected result would be a successful mascara composition, which has the beneficial qualities of Pastour's composition, which are ease of application, softness, uniformity,

Art Unit: 1615

hold, and good sensory qualities. Therefore, this invention as a whole would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made.

Response to Arguments

Applicant's arguments have been fully considered but are not found to be persuasive. Applicant has amended the claims to include the phrase "tacky constituents." Applicant argues that the term extract, as used in applicant's claim language, is defined in the specification to be the substantially whole processed fruit or vegetable, without the seeds. Applicant argues therefore, that the claimed "extract" differs from the active principle disclosed in the cited reference. The examiner still does not find this line of arguments persuasive. First, as stated by applicant, in the instant specification, the term extract is defined to have this special meaning such that the extract is prepared using seedless but otherwise whole fruit of vegetable. This does not mean that the extract is a substantially whole processed fruit or vegetable, it simply means the extract came from a substantially whole processed fruit or vegetable. Applicant asserts that the tacky components of the fruit or vegetable are not separated or purified to make the whole processed fruit or vegetable extract, and that the pulp and skin are present in the extract of the present invention. The examiner points out that neither of these limitations is present in the instant claim language, and are therefore not considered in determining patentability.

Applicant continues to argue that the reference does not teach plant extracts, but instead teaches the active principle of a plant extract. The examiner again disagrees. As stated by applicant, the reference teaches active principles such as plant extracts. This does not mean the

Art Unit: 1615

active from within the plant extract, it means that the reference considers the plant extract to be an active principle.

Applicant again argues that the examiner is incorrect in the assertion that the results of applicant's invention are not unexpected. Applicant contends that the ability of their mascara to perform as well as conventional mascaras is unexpected because their invention contains substantially whole or unprocessed fruit or vegetable extracts. It is the position of the examiner that adding additional ingredients to a traditional formulation, and discovering that it works just as well as the known formulation, is indeed not unexpected.

It remains the position of the examiner that applicant's broad claim to a fruit or vegetable extract, has not been differentiated from the known art-related use of the term extract. It is the recommendation of the examiner that applicant place the specific fruit and vegetable extracts being used, into the independent claims. It is further the position of the examiner that applicant insert into the claim, all the terminology used in the arguments, to differentiate between applicant's extract and the art's extract. These additions will help advance prosecution towards an allowance.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy E Pulliam whose telephone number is 703-308-4710. The examiner can normally be reached on Mon-Thurs 7:30-5:00, Alternate Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on 703-308-2927. The fax phone numbers for the

Art Unit: 1615

organization where this application or proceeding is assigned are 703-305-3592 for regular communications and 703-305-3592 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
